

C. Earl Hunter, Commissioner

Promoting and protecting the health of the public and the environment.

PUBLIC NOTICE

This public notice is strictly for informational purposes.

Due to the change in the Critical Area regulations that went into effect June 24, 2005, OCRM has had to revise the dock general permit. The dock general permit can no longer be used for adding any boatlift or davit system, nor for any type of floating boat storage. Below is the new wording for the dock general permit.

GP-03-001: Authorizes the following additions to existing, grandfathered, or previously permitted private docks, both single and joint use and does not conflict with OCRM Regulations: Catwalks 3' wide to existing boatlifts, roofs on existing pierheads (as precedent in the area dictates), handrails, utilities, benches, storage boxes, sinks, and mooring piles. **(NOTE: the dock general permit does not apply to adding boatlifts or making additions that increase the overall square footage of the structure, or for adding floating jet docks (or other similar structures as determined by OCRM). All drawings submitted under this GP must be computer generated.**
